# **AXIOMTEK LCD Support Policy**

July, 2007 Revised

### Objective:

Due to the growing demands of LCD lighting service and more and more various embedded applications, AXIOMTEK's Application Engineers (AE) are capable to develop various LCD wiring kits and modify VGA BIOS to help customers easily installing chosen LCD modules onto targeted systems. In order to manage LCD lighting service process and to speed up the cooperation between AXIOMTEK and customers, this policy will guide customers to understand what friendly LCD services we provide.

#### Service Process:

- 1. Customer fills in the "LCD Support Request Form" and sends it to AXIOMTEK sales or AE.
- 2. AXIOMTEK AE team will evaluate the feasibility and check LCD database.
- 3. Customer signs back "LCD Lighting Agreement" and provides complete LCD kit (LCD panel, inverter, cable) to AXIOMTEK AE team.
- 4. AXIOMTEK AE will determine the possibility of making LCD sample cable.
- 5. AXIOMTEK AE will perform LCD lighting test and advise solution to customer.
- 6. Log the solution in AE LCD support database

## Service Charge:

- 1. For fine tuning VGA BIOS for the LCD panel, AXIOMTEK will initially charge customer <u>USD\$ 500</u>. Exception could be made by AXIOMTEK Regional AE Managers or Sales Managers.
- The above fee is refundable upon certain quantity of purchase from AXIOMTEK based on sales managers' decision.
- 3. In case needed, the sample cable will be charged at <u>US\$30 each</u>. The minimum ordering quantity for the sample cable is <u>5 pcs.</u>

#### **Processing Time:**

- 1. It will take <u>7 working days</u> for validating the solution after customer provides the complete set (LCD panel, inverter, cable)
- It will take 14 working days or longer to make the cable and validate the solution if customer does not provide the complete LCD set.

# **LCD Support Workflow**

- 1. Customer, Sales person asks AE team for LCD lighting service.
- 2. Customer fills in "LCD Support Request Form" to AXIOMTEK AE team.
- 3. AE team evaluates technical feasibility and checks existing LCD database
- Customer signs back the "LCD Lighting" Agreement" to AXIOMTEK AE.
- Customer provides complete LCD Kit to AXIOMTKE AE.
- 6. AE decides making LCD sample cable or not
- 7. AE Performs LCD Lightening test ( hardware setup, function test, application test)
- 8. AE provides complete solution. (Inverter cable, LCD cable, available VGA driver and BIOS)
- 9. Log all technical information in LCD support list. (AE).
